Software Development in Test (SDET)

Experienced SDET engineer with 10+ years in the industry in various domains such as Banking, Ecommerce/Retail, etc., leading test operations in teams of varying sizes in designing and conducting complex test cases & scenarios. Maintained 25+ testing servers and optimized documentation & reporting preparation procedures. Applying expertise towards boosting revenue and reducing operational costs for companies through implementing targeted quality assurance processes.

WORK EXPERIENCE

Senior SDET

November 2015 – Present

Resume Worded, New York, NY

- Satisfied a particular client's high demands alongside a team of engineers, QA testers, and developers which led to successfully securing a \$3,750,000 contract despite a tight deadline.
- Ran over 6000 regression tests by constructing a Selenium framework which identified 20 minor and 7 major defects early on.
- Optimized documentation and reporting preparation procedures which cut down reporting time by 20%.
- Mentored 55+ new testers and QA staff on company methodologies and procedures increasing employee efficiency by 17%.

Senior SDET

June 2013 – October 2015

Growthsi, San Francisco, CA

- Implemented multi-threading execution which reduced the total amount of time to execute automated tests by 65%.
- Reduced a week-long delivery process to 1 day.
- Constructed test scenarios that focus on finding issues early in the testing process which led to an overall reduction in issue-related delays by 55%.
- Oversaw the test team's creation of a Hybrid Automation Framework using Cucumber and Selenium that resulted in a decrease in test execution time to 90%.
- Led a 30-member multidisciplinary team (technical and non-technical) on concurrent projects completing them on an average of 1 month prior to the deadline.

Junior SDET

August 2010 – January 2013

Resume Worded's Exciting Company, New York, NY

- Analyzed business models and suggested innovative solutions that increased revenues by 5%.
- Organized and automated the test cases which reduced the total amount of time spent to execute the full regression tests by 75%.
- Improved the quality of the stackable systems within 2 months leading to a reduction in the defect profile by 11%.
- Led an initiative alongside the Automation team to create regression test suites for all systems which induced a 45% reduction in testing which allowed for faster production deployment.
